

## Limited Custom Program - USA Order Form

Custom orders require a \$250.00 deposit paid to the Firewire Retailer before delivery date is confirmed.

Delivery within the USA and Australia will be 10-12 weeks from the deposit receipt date. Firewire will email proof of deposit and delivery confirmation to both retailer and customer.

All custom orders include a \$75.00 surcharge over Firewire's retail prices at the Firewire dealer nearest the customer.

If customer prefers direct ship option rather than pickup at a Firewire dealer, an additional freight charge will be billed to the below card before shipping.

USA: East Coast & South East: \$100.00; Mid-West & Texas: \$75.00; Northern California, Oregon & Washington: \$50.00. Australia & Europe: Advised at time of booking with dealer.

The LCP offers Firewire's cutting edge **RapidFIRE** Technology in the **Alternator** and **FlexFire** Series, our most high performance designs. We have developed the options below to ensure that the customised board meets your 'dimensional' needs, but still remains true to the original design principles inherent in those boards.

- LCP boards will have the standard FlexFire or Alternator outlines, bottom contours and overall foils (no wings, channels, etc). We will adjust the nose and tail widths to reflect any changes to the wide point while still retaining the outline of the particular Series you choose. For example, in a given width, the Flexfire has a narrower nose and tail than the Alternator. Check our website for the dimensions on our stock boards which clearly show the difference.
- LCP widths and thicknesses are offered in 1/8" increments.
- LCP lengths are offered from 5' 10" - 6' 8" in 1" increments.
